ABOUT ME

After I graduate as an engineer, I had a chance to work in different fields of the IT industry in a short time. Based on my observations, I followed my passion and decided to shape my path working in Machine Learning related roles. My motivation sources are discovering and being challenged. Currently, I am doing my Master of Science degree in Computer Science at TU Munich and learning about Computer Vision and Graphics. Working on Computer Vision gives me a lot of opportunities to discover new things and being challenged. I always aim to create a positive impact with my work and being remembered for it.
